Step 1 → Project Creation

npx create-react-app project_name_in_small_letter

or

npm init react-app project_name

Step 2 → react router dom installation

npm install react-router-dom

Step 3 → index.js (importing Browser Router) and wrapping it to <App />

Step 4 → Creating a JSX file for Home page in ./pages folder

Step 5 → In App.js will import Routes and Route

Then will define routes and import the page components

Home work

Npx, npm, jsx

Props, Hooks
